

B.A.L.C.S. SOFT ARMOR PANELS

**BODY ARMOR LOAD CARRIAGE SYSTEM
NIJ LEVEL IIIA + IOTV FRAG PROTECTION**

**OM TACTICAL'S BALCS OMT-FXIII
SOFT ARMOR PANELS
ARE CUT TO FIT ANY
LOAD CARRYING VEST
BUILT TO THE MIL-SPEC FOR
THE SPEAR/BALCS, OR
CIRAS BODY ARMOR
LOAD CARRIAGE PROGRAMS.**

Available in small, medium, large, and X-large, OM Tactical's BALCS IIIA+ Armor Panels are tested in accordance with the NIJ Soft Body Armor Standard for Level IIIA, and then further Certified to the US DEA Soft Body Armor Ballistic Test Protocol, and then in accordance with Mil-Std 662F for fragmentation performance to the US Military IOTV Testing Requirements.

OM Tactical's BALCS IIIA+ is 100% made in the USA Starting with a Kevlar Based Woven Laminate, that allows us to build a monolithic armor package, that is one of the softest IIIA designs on the market, That can achieve NIJ 2005 Requirements, Contact Shots, edge shots, and close proximity shots as required in the DEA Protocol, and also be able to exceed the protection level of currently fielded US Military Body Armor. The OM Tactical BALCS OMT-FXIII Achieves that level of performance.
